ANWARA FAVOUR CHIKA

Backend Developer

✉ Favourchika02@gmail.com   in LinkedIn   𝕏 Twitter   ○ Github

Career Objective

My Objective as a backend developer is to continue honing my skills in designing, building, and optimizing scalable and secure backend systems. I aim to contribute to innovative projects, collaborate effectively within cross-functional teams, and advance my expertise in emerging technologies to deliver robust and efficient solutions that drive business success.

Education

Computer Engineering,   09/2019 – 07/2024 │ Enugu State, Nigeria
Enugu State University of Science and Technology

Experience

Software Engineer, *Kribsavup* ↗   01/2024 – present │ Remote, US
- Consistently met project deadlines by effectively managing time and prioritizing tasks according to importance.
- Partnered with development team on product development and application support plans.
- Integrated third-party tools and components into applications.
- Identified and documented project changes with proactive budget oversight.
- Reduced system downtime by proactively addressing potential issues through regular maintenance activities.

Backend Web Developer, *Buildhubb* ↗   08/2021 – 08/2023 │ Remote, Nigeria

- Mentored junior developers, fostering a supportive team environment for learning and growth.
- Defined and maintained databases to deliver responsiveness to data client requests.
- Developed web platform back ends using NodeJS frameworks.
- Optimized web applications for speed, scalability and security.
- Maintained strict budgetary and scheduling guidelines to satisfy customers with high-quality, targeted designs.
- Collaborated with in-house web designers to create sleek and innovative UI design.

WordPress Developer, *Recheo Health Foundation*   03/2021 – 06/2022 │ Remote, Nigeria
- Utilized HTML5 and CSS3 coding techniques while developing custom themes and plugins for WordPress websites
- Conducted thorough testing to identify and resolve bugs, ensuring optimal site performance across various devices and browsers.
- Provided technical support when needed regarding any issues with existing WordPress website.
- Leveraged strong understanding of WordPress core to manipulate admin and theme components.

Backend Developer Intern, *HNGX*   06/2020 – 08/2020
- Collaborated with cross-functional team on successful ideation and development of a crowdfunding platform.
- Deployed AWS-hosted microservices using Docker, resulting in increased scalability and reliability for the platform.
- Leveraged payment gateway services like Flutterwave and Paystack to enable seamless sending and receiving of funds on the platform.

Projects

ChatCord:
This is a Chat bot system built with websocket(socket.io) where programmers can interact with each other, it's more like a social media app for Developers.

- Utilized: Node js, MongoDB, Rest API and Websocket for real time communication.

Agrolux

An agro-farm application which is used by farmers to predict the exact time or season to plant a particular crop using an AI model. It was a team project so i worked on the backend with nodejs. I was responsible for developing the weather API which the AI model used for it's prediction. I also worked on the user authentication and authorization.
- Utilized: Node js, Express, Weather API (third party Api), JWT, REST API.

Eventtrak:

This is an application that was built with, express, nodemailer and MongoDB for database management. It's an event application where users can search for upcoming events, create events and book tickets. It was a team project and I worked on the backend.

You can check out other projects on my Github link above.

Skills

Html, Css • **Javascript** — Nodejs • **Git** — Github • **MongoDB, MySQL** • **WordPress** • **React Js** •

Canva • **Typescript** • **Technical Writing** • **Cloud Computing** — (AWS) • **Team work** •

Problem Solving Ability • **Strong debugging skills** • **API Design and Development** •

Multitasking Abilities • **Solutions deployment**
